**Subject:** Travers to respond to Becki -- FW: Third Bullet -- RE: Follow up Qs from today's staff meeting

Eric – I alerted Dave Travers to Becki's third bullet below and that I thought that Steve Allgeier was OGWDW's point person on this issue.

Dave said that Steve is in the office today. Dave will respond to Becki on this issue.

February 7, 2014

Becki,

I know that Eric has been working with R3 on this question. I'll see if I can find some information that he has relayed to me.

## **Ex. 5 - Deliberative**

· I mentioned the ongoing assistance on the Elk River spill, which prompted questions about the status of the Duke Energy spill. I promised to send them the latest update, which I just received from Kevin Tingley (thanks, Kevin!)

· We also talked a bit about the issue of the odor threshold for the MCHM additive. Mike asked if it was possible that the additive was adhering to the pipes even though the MCHM had passed through/degraded. Didn't know the answer to that one. Eric or Phil, do we know?

## **Ex. 5 - Deliberative**

That's all. Have a great weekend!

Becki Clark, Deputy Director

Office of Ground Water and Drinking Water

U.S. EPA
